

ATTACHMENT 9: PAST PERFORMANCE

The Glenn County Department of Agriculture has been involved with and has completed many grant funded projects. See below:

- 2001 AB 303 LGA grant to install dedicated monitoring well and extensometers
- 2002 AB 303 LGA grant to install dedicated monitoring well and extensometers
- 2003 Stony Creek Groundwater Recharge Evaluation in Cooperation with DWR Northern District and the Bureau of Reclamation
- 2003 AB 303 LGA grant to install dedicated monitoring well and perform aquifer performance tests in the shallow aquifers of the Stony Creek Fan
- 2004 Establishment of Baseline Elevations for Subsidence by Global Positioning System in Cooperation with DWR Northern District
- 2004 Great Valley Center LEGACY grant exploring urban expansion in the Orland Area of Glenn County
- 2004 AB 303 LGA grant to perform Preliminary Plan tasks; Water Needs Analysis, Infrastructure Mapping, and Comprehensive Monitoring Program Development.
- 2005 Stony Creek Groundwater Recharge Evaluation in Cooperation with DWR Northern District and the Bureau of Reclamation
- 2005 Four County Drinking Water Strategy, CALFED Drinking Water Program
- 2007 Hydrogeologic Evaluation in the Wilson Creek Drainage in Glenn County with the Colusa Basin Drainage District. This project was to provide information prior to design and/or construction of a detention facility located in that area. The proposed work plan is consistent with the CBDD Integrated Water Management Plan (2002) to develop programs that will:
 - Work in tandem with local and state agencies
 - Provide opportunities for groundwater recharge
 - Be consistent with CALFED goals and objectives
- 2008 Participated in the Sacramento Valley Height Modernization Project for Subsidence by Global Positioning System in Cooperation with the Department of Water Resources and the Bureau of Reclamation
- 2010 Active participant in the Northern Sacramento Valley Integrated Water Management Plan

development for the six counties (Glenn, Butte, Tehama, Sutter, Shasta, Colusa)

- 2011 Currently engaged in the Glenn County Groundwater Reliability and Recharge Pilot Program grant, a cooperative program with Glenn-Colusa Irrigation District funded by Prop 204
